

QPushButton

QPushButton

curve\_storage.gui.SaveFitButton

```
classDiagram
    class QPushButton
    class SaveFitButton["curve_storage.gui.SaveFitButton"]
    QPushButton <|-- SaveFitButton
```

The diagram illustrates a class inheritance relationship. At the top, there are two boxes, both labeled 'QPushButton'. Below them is a third box labeled 'curve\_storage.gui.SaveFitButton'. A horizontal line connects the bottom of the two 'QPushButton' boxes. From the center of this line, a vertical line descends to the top of the 'curve\_storage.gui.SaveFitButton' box. From the point where the vertical line meets the top of the 'curve\_storage.gui.SaveFitButton' box, two arrows point upwards: one to the bottom of the left 'QPushButton' box and one to the bottom of the right 'QPushButton' box, indicating that 'curve\_storage.gui.SaveFitButton' inherits from 'QPushButton'.
