

QWidget

QWidget

curve_storage.database.setConfigWidget

```
graph BT; A[QWidget] --|> B[QWidget]; B --|> C[curve_storage.database.setConfigWidget];
```

The diagram illustrates a class hierarchy. At the top, there are two boxes, both labeled 'QWidget'. A horizontal line with upward-pointing arrowheads at both ends connects the bottom of these two boxes. From the center of this line, a vertical line descends to the top of a third box labeled 'curve_storage.database.setConfigWidget'. This structure represents that 'curve_storage.database.setConfigWidget' inherits from both 'QWidget' instances.
