

QWidget

QWidget

curve_storage.gui.EditCurveWindow

```
classDiagram
    class QWidget
    class EditCurveWindow["curve_storage.gui.EditCurveWindow"]
    QWidget <|-- EditCurveWindow
```

The diagram illustrates a class hierarchy. At the top, there are two separate boxes, each labeled 'QWidget'. Below these, a single box is labeled 'curve_storage.gui.EditCurveWindow'. A horizontal line connects the two 'QWidget' boxes, and a vertical line descends from the center of this horizontal line to the 'curve_storage.gui.EditCurveWindow' box. From the point where the vertical line meets the horizontal line, two arrows point upwards, one to each 'QWidget' box, indicating that 'curve_storage.gui.EditCurveWindow' inherits from 'QWidget'.
