

QSpinBox

QSpinBox

curve_storage.gui.SpinBoxWidget

```
classDiagram
    class QSpinBox
    class SpinBoxWidget["curve_storage.gui.SpinBoxWidget"]
    SpinBoxWidget --|> QSpinBox
```

The diagram illustrates a class inheritance relationship. At the top, there are two boxes, both labeled 'QSpinBox'. Below them is a single box labeled 'curve_storage.gui.SpinBoxWidget'. A horizontal line connects the two 'QSpinBox' boxes, and a vertical line descends from its center to the 'curve_storage.gui.SpinBoxWidget' box. From the left side of this vertical line, an arrow points up to the left 'QSpinBox' box. From the right side of the same vertical line, an arrow points up to the right 'QSpinBox' box. This indicates that 'curve_storage.gui.SpinBoxWidget' inherits from both 'QSpinBox' instances.
