

QWidget

QWidget

curve\_storage.gui.WindowWidget

```
classDiagram
    class QWidget
    class WindowWidget["curve_storage.gui.WindowWidget"]
    QWidget <|-- WindowWidget
```

The diagram illustrates a class hierarchy. At the top, there are two boxes, both labeled 'QWidget'. Below them is a box labeled 'curve\_storage.gui.WindowWidget'. A horizontal line connects the two 'QWidget' boxes. From the center of this line, a vertical line descends to the top of the 'curve\_storage.gui.WindowWidget' box. From the top of this box, a horizontal line extends to the left, ending in an arrowhead pointing at the bottom of the left 'QWidget' box. Another horizontal line extends to the right, ending in an arrowhead pointing at the bottom of the right 'QWidget' box. This represents that 'curve\_storage.gui.WindowWidget' inherits from both 'QWidget' instances.
